## Powder Coated Ornamental Iron and Hollow Balusters

We are very excited to be offering a new Powder Coated Ornamental Iron available in pre-finished colors. The line contains a variety of desirable colors for newel posts, pickets and accessories. Also available in this line are hollow balusters, which weigh and cost less. These items come individually wrapped to protect the finish. They are also priced very competitively and offer a wide assortment of designs. Call today for more information!

### More About Hollow Balusters

Powdered Coated iron stair parts feature "hollow" baluster line. The benefits of Hollow Balusters are:

- ◆ Lighter for easier handling in the field
- ◆ Strength in the baluster using tubular steel
- ◆ Cheaper freight costs verses solid bar balusters
- ◆ Quicker trim cuts and blade savings compared to working with solid bar balusters
- ◆ All iron balusters are centered from the top measuring a consistent 43" in length allowing for custom trims regardless of the staircase
- ◆ Shoes – uniform and consistent ... what a novel idea. No more wondering if the shoes fit.
- ◆ All 28 profiles are available in raw steel as well.
- ◆ **MORE SHOES & ACCESSORIES!**

Please take a moment and review our website. If you have any questions please contact us and our experienced sales team would be happy to answer any of your questions. Our terms are cash, check and VISA/MasterCard. Credit can be established by submitting a credit application.

### About Us ...

Hinton Steel Company is a steel source established in 1978. We are one of the leading distributors of rolled steel products and ornamental steel components in the Rocky Mountain region. The company is located in Denver, Colorado and has a fully stocked 20,000 sq. ft warehouse and experienced sales team that can help you with your structural and ornamental steel needs.
